EDUCATION

Sushila Devi Bansal College

B.Tech in Computer Science | CGPA: 7.40

2021 – 2025

Indore, India

ILVA Higher Secondary School

Class 12 | Percentage: 70%

2020 – 2021

Indore, India

EXPERIENCE

D&M Tech Company

Role - Java Developer

May 2026

indore ,MP

- Developed and enhanced REST APIs using Java, Spring Boot, Spring Data JPA, and PostgreSQL.
- Designed database schemas, API documentation, and Swagger/OpenAPI for scalable backend services.
- Implemented and tested CRUD APIs, JWT authentication, and Swagger/OpenAPI documentation.

PROJECTS

ChatSaar AI | React, FastAPI, Groq AI, Python

July 2026

- * **Built an AI-powered WhatsApp chat analyzer** that reduced group chat review time by **80%** by parsing exported chat files and generating **AI-powered summaries**, deadlines, and action items using **Gemini Flash**.
- * **Developed a FastAPI backend** with a structured chat parser capable of processing **1,000+ messages in under 15 seconds**, converting raw chat exports into clean **JSON** for AI processing.
- * **Implemented topic classification** and announcement detection using **Gemini AI**, automatically identifying placement updates, exam notices, deadlines, and important discussions from noisy group conversations.

GEN AI Interview Planner | React, Node.js, Express.js, MongoDB, Gemini AI

Jan 2026

- * **Built an AI-powered interview preparation platform** using the **MERN stack** and **Gemini AI**, reducing manual job preparation time by **60%** through automated resume analysis and interview planning.
- * **Implemented AI-driven resume analysis, skill-gap detection, and personalized interview question generation** by comparing resumes against job descriptions.
- * **Generated ATS-friendly PDF resumes** using **Puppeteer** and secured the application with **JWT authentication**, including **token blacklisting** for enhanced security.

Route Finder | React, Node.js, Express.js, MongoDB

May 2025

- * **Developed a full-stack route optimization application** using the **MERN stack** and implemented **Dijkstra's Algorithm** to compute the **shortest and lowest-cost paths** between locations.
- * **Built RESTful APIs with Node.js and Express.js** to process graph data and deliver **real-time route calculations** with efficient backend performance.
- * **Designed responsive React.js interfaces** and integrated **MongoDB** for dynamic data storage, enabling fast route visualization and seamless user interaction.

TECHNICAL SKILLS

AI Tools: Gemini AI, Groq/Llama 3, Puppeteer, JWT

Languages: C++ , python , , JavaScript (ES6+)

Frontend: HTML5, Tailwind CSS , React.js

Backend: Node.js, Express.js , FastAPI — REST API Design

Database: MongoDB

Developer Tools: VS Code ,Rpi , Git, GitHub

CERTIFICATIONS

- * **Smart India Hackathon – Secured 2nd Rank at College**
- * **J.P. Morgan Virtual Internship**
- * **YUVA AI for all- India ai**
- * **Claude Code 101 - Anthropic**
